

Margin Notes

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat.

Lorem ipsum dolor. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aequi doleamus animo, cum.

Multiple reviewers? Customize your margin note colors:

```
#let reviewer-a = margin-note.with(stroke: blue)
```

```
#let reviewer-b = margin-note.with(stroke: purple)
```

This is a margin note.

Overlapping notes? Use `dy: <amount>` to adjust the vertical spacing.

Hi there!

Don't like the default color or side? Update them to something more appealing.

Todo:

- Auto-track the lowest current note per side so manual adjustment of `dy` isn't necessary
- Incorporate logic from <https://github.com/typst/typst/issues/1882> when it's resolved to avoid users explicitly calling `drafting.set-page-properties`

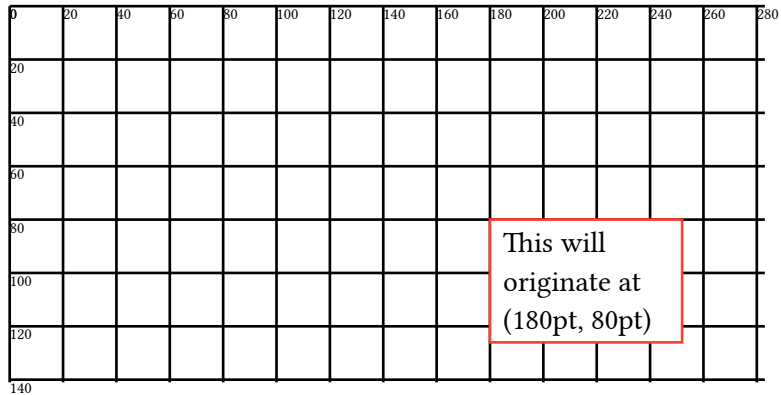

Shake things with notes on both sides of the page.

Hello!

Yellow on the left!

Placements

Need to measure space for fine-tuned positioning? You can use `rule-grid`, but you can't specify dimensions using %:

What about absolutely positioning something regardless of margin and relative location? `absolute-place` is your friend. You can put content anywhere:

This will
originate at
(0%, 50%)

The “rule-grid” also supports absolute placement at the top-left of the page by passing `relative: false`. This is helpful for “rule”-ing the whole page, i.e.:

```
#rule-grid(width: 8.5in, height: 11in, relative: false)
```
